The Silent Destruction: Environmental impacts of drug production and trafficking and State responses in Latin America and the Caribbean

Financiado por
la Unión Europea

COPOLAD

The cover of the report 'The Silent Destruction' features a white background with a grey border. At the top left is the COPOLAD logo. To its right is a large green rectangular area. Below this is the title 'The Silent Destruction:' in bold black font. Underneath the title is a detailed description of the report's focus: 'Environmental impacts of drug production and trafficking and State responses in Latin America and the Caribbean'. At the bottom left is the text 'Funded by the European Union' next to the EU flag, and the COPOLAD logo again. A large green wavy line graphic runs along the bottom edge of the cover.

Cooperation Programme between Latin America, the Caribbean and the European Union on Drug Policies

The Silent Destruction:

Environmental impacts of drug production and trafficking and State responses in Latin America and the Caribbean

THE SILENT DESTRUCTION

Objective of the report

To identify and explore the negative environmental impacts linked to the production and trafficking of illicit drugs and the interventions aimed at reducing supply

What is the contribution of this report?

2022

2023

2024

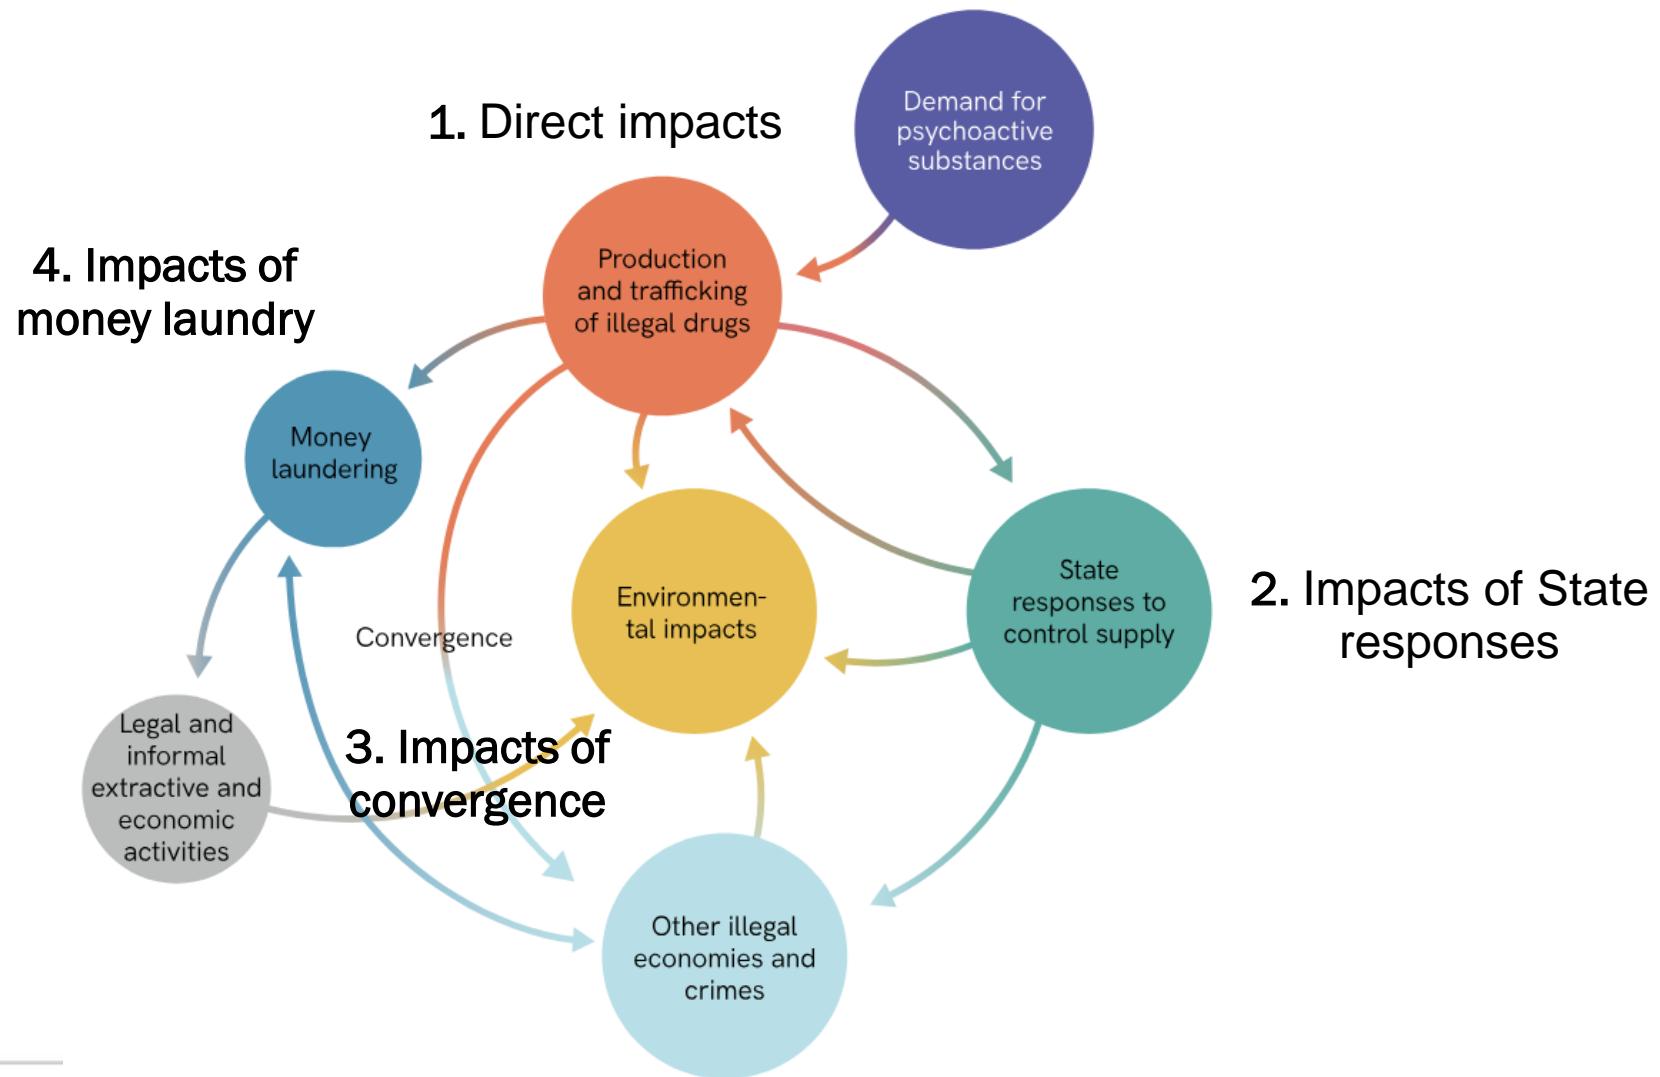

- **A systemic perspective** that analyzes and proposes possible alternatives to avoid, reduce, or compensate for environmental impacts.
- **Focus on Latin America** (and The Caribbean)
- Risks and impacts of the **State's responses**.
- **A methodological tool** for identification and monitoring the impacts.

THE SILENT DESTRUCTION

COPOLAD III es un consorcio formado por:

1. Impacts of illicit crops

Catatumbo and the Amazon in Colombia (2005 – 2014):

4% Direct deforestation

42% Estimated deforestation considering territorial changes

Ucayali Department in the Peruvian Amazon (2003-22):

50% of new coca crops in areas deforested for this purpose

Western Amazon Region:

48% Increase in the likelihood of deforestation compared to areas where there was not a history of coca crops cultivation

COPOLAD III es un consorcio formado por:

The New York Times

'Narco-deforestation' and the future of the Amazon

The fate of Colombia's rainforest may lay in the hands of a rebel group linked to drugs and illegal mining.

Impacts of illicit crops

ASSOCIATED WITH ILLEGAL CROPS
Granular/fragmented deforestation

ASSOCIATED WITH OTHER DYNAMICS
Large-scale deforestation

The responsibility for environmental impacts should not be placed on small producers and Indigenous communities in a vulnerable situation but **on actors with economic resources and the capacity to use coercion.**

la Unión Europea

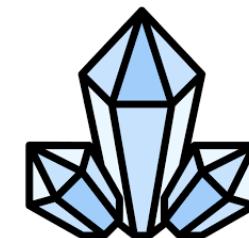

Production impacts

Potential coca leaf production

In 2022, 148.5 thousand tons of solid substances and 762.3 million liters of liquid substances

UNODC

Clandestine methamphetamine production

It could generate between 3,102 and 3,942 tons of chemical waste

3. The puzzle together: Amplifying the impacts

Convergence with crimes that impact the environment

Drug trafficking acts as a catalyst for other criminal activities.

Type of convergence

Illegal wildlife trafficking

Smuggling routes and shared transportation methods

Barter trade

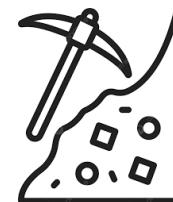

Illegal timber trafficking

Combined trafficking

Money laundering

Illegal mining

Shared smuggling routes and transportation methods

Illegal drug production and environmental crimes in the same territory

Money laundering

3. The puzzle together: Amplifying the impacts

The impact on environmental defenders and Afro-descendant and indigenous communities

88% of the murders of defenders occurred in Latin America

36% were indigenous, and **7%**, Afro-descendants.

Indigenous Reserves

23,794 hectares of coca

127%
from 2018 to 2022

18,076 hectares of coca
